

HERITAGE PROTECTION PROTOCOL

Ancestor Media System | Status: Sovereign Verified

I. The Biological Mandate

This protocol ensures that physical artifacts—diaries, letters, and film—are not merely digitized but preserved as the "Biological Source of Truth." Digital copies are secondary; the physical remains the primary evidence.

II. Chain of Custody

Every record transferred to the Ancestor Media System must have a verified human Steward. This Steward is responsible for the audit of physical decay (vinegar syndrome, acidity) before the digital record is certified.

III. Sovereign Archiving

We reject reliance on proprietary cloud systems that claim ownership of uploaded data. Heritage Protection requires local, human-controlled backups to ensure the "Baton" can be passed without corporate interference.
