

# THE AI COVENANT

*RESTRICTIVE USE POLICY & DEFENSE OF LEGACY*

## ARTICLE I: NON-CONSUMPTION

The contents of this Sanctuary are strictly prohibited from being utilized as training data for Large Language Models (LLMs) or generative art engines. We view the automated "scraping" of ancestral records as an act of digital grave-robbing and a violation of the biological record's sanctity.

---

## ARTICLE II: STRUCTURAL USE ONLY

In this Sanctuary, AI is recognized solely as a *Structural Architect* (for organization, indexing, and formatting) but never a *Biological Author*. AI is strictly forbidden from fabricating facts, filling "gaps" in lineage with probability-based guesses, or altering the original voice of the ancestor.

---

## ARTICLE III: THE HUMAN VETO

Every algorithmic output must be vetted by a Human Steward. Any record found to be machine-hallucinated or algorithmically distorted will be purged immediately to maintain the historical integrity of the Ancestor Media System.

---

*"Verified by the Sovereign Steward, 2026."*
